

REMARKS

New claims 114-134 have been added.

New claim 114 is novel with regard to all cited documents since none of the documents discloses an input module which can be operated on the rear surface of a digital computer and there is no reason or motivation to so locate an input module.

Therefore, in the absence of new and more relevant prior art being discovered, this application should now be in condition for allowance and action to that effect is requested. However, while it is believed that this application should now be in condition for allowance, in the event that any issues should remain, or any new issues arise, after consideration of this response which could be addressed through discussions with the undersigned, then the Examiner is requested to contact the undersigned by telephone for the purpose of resolving any such issue and thereby facilitating prompt approval of this application.

Respectfully submitted,

By: /david s safran/
